

Cashmanager RURAL ONLINE

- Solves the problem of moving data between computers.
- Online is the future for accounting software.
- Always have the most up to date version of the software - never have to do an upgrade again.
- Accounting tasks can be delegated while also maintaining privacy of information- you can decide who views what.
- Specially tuned for flaky rural broadband.
- Special pricing for associated companies and trusts.

WHO USES CASHMANAGER RURAL ONLINE?

Farmers who

- Move data between computers, including to an accountant, advisor or business partner
- Want to delegate recording tasks to a secretary/clerk
- Are proactive and value using the latest technology
- Are innovative operators who drive profitability

Accountants who

- Want to move beyond compliance
- Are farming specialists who deliver regular management reports to clients
- Want to always have current data available to support advice
- Want to keep financiers fully informed
- Want to use data feeds and auto coding and exercise more control over data

Advisors who

- Have equity in properties they manage or have responsibility to report to stakeholders
- Work closely with clients to increase profit and wealth

TUNED FOR RURAL BROADBAND

Cash Manager Rural is specially tuned for rural broadband whether it is delivered by copper wire, radio, satellite or fibre. It will be quick to operate and will tolerate short outages without making you wait and without risking the loss of recent changes should it drop out.

FEATURES

- Sample setups for most farm types
- Electronic import of bank and trading company statements
- GST reporting on Cash or Invoice basis
- Integrated Wagebook
- Invoicing
- Fully integrated debtors module (optional)
- Budget Worksheets and comments
- Fully integrated cashflow forecasting with monthly revisions
- Enterprise analysis

ALISTAIR MCLENNAN, - CHARTERED ACCOUNTANT, MARKHAMS WAIRARAPA LTD

"Farmers need to use a farm accounting program designed especially for them, one with features such as stock reconciliation, budgeting and cashbook.

Cashmanager RURAL ONLINE is easy to use and provides farmers with 'live information' which is vital to the success of their farming operation, it also makes their job and our job easier.

JIM LAW, FEATHERSTON

"The main reason I like the "online" version is that both our farm manager and I can look at the same up to date information. We have some simple protocols on updating the data and it works well. Cashmanager then becomes the agreed reference point on just how things are going. Our farm consultant has also accessed directly from Cashmanager. Another advantage is that I don't have to worry so much about back-ups."

MINIMUM REQUIREMENTS

- Broadband Internet
- Windows XP or newer

Ask about the special pricing for associated companies and Trusts.

Your existing Cashmanager RURAL data easily uploads to the Online version.

CASHMANAGER CRT ONLINE

Is a version of Cashmanager RURAL ONLINE with additional benefits for CRT customers

- All your CRT store and card transactions arrive in your Cashmanager RURAL software - pre-coded to standard Cashmanager RURAL accounting and management codes.
- The more farm supplies you purchase on your CRT card, the less work you'll have to do on your accounts.
- Easy access from your MyCRT account.
- Ability to share data with others easily and in real time - business partners, accountant, farm consultant, banks.
- Data security - your farm data is stored centrally. No need to worry about backing up your PC or losing essential management information.

Financial software for farm management teams
